

#### 1. Identification of Substance or Mixture and of the Supplier

Material Name : Light Sour Crude Oil
Recommended Use / : Refinery feedstock

**Restrictions of Use** : Use in accordance with this SDS only

Suppliers Details : Attock Refinery Limited

P.O. Refinery, Morgah, Rawalpindi, Pakistan

Telephone/Fax Number Tel: +92-51-5487041-45 Fax: 92-51-5487093-4 Email: info@arl.com.pk

**Emergency Phone Number** : +92-51-5487041

#### 2. Hazard Identification

GHS Classification Flammable Liquids, Category 1

**Aspiration Hazard**, Category 1

Eye Damage/Irritation, Category 2A Germ Cell Mutagenicity, Category 1 Skin Corrosion/Irritation, Category 2 Toxic to Reproduction, Category 2

GHS Label Elements & Precautionary
Statements

#### :Signal Word

Danger

#### **Hazard Statement (s)**

H201 Obtain special instructions before use

**H202** Do not handle until all safety precautions have been read **H210** Keep away from heat/sparks/open flames/hot surfaces

H233 Keep container tightly closed

**H240** Ground/bond container and receiving equipment **H304** May be fatal if swallowed and enters airways

H315 Causes skin irritation H319 Causes eye irritation

Product Identifier: Light Sour Crude Oil Ver. 2

Issue Date: 15-Dec-2021
Revision Date: 06-Feb-2024
Ref No: ARL-SDS-001B

Page 1 of 11

H335 May cause respiratory irritation

**H336** Specific target organ toxicity (single exposure)

H340 May cause genetic defects

H350 May cause cancer

**H360** Possible risk of harm to the unborn child

H373 Specific target organ toxicity (repeated exposure)

**H411** Toxic to aquatic life with long lasting effects

#### **Hazards Not Otherwise Classified**

May contain or release poisonous hydrogen sulfide gas

#### Precautionary Statement (s) - Prevention

P102 Keep out of reach of children

P201 Obtain special instructions before use

P202 Do not handle until all safety precautions have been read

**P210** Keep away from source of ignition, hot surface and open flames.

P233 Keep container tightly closed

**P240** Ground/bond container and receiving equipment.

**P241** Use explosion-proof electrical/ ventilating/ lighting/ equipment

**P242** Use only non-sparking tools.

**P243** Take precautionary measures against static discharge.

**P261** Avoid breathing dust/fume/gas/mist/vapors/spray

**P264** Wash contaminated skin thoroughly after handling.

**P271** Use only outdoors or in a well-ventilated area

**P273** Avoid release to the environment

**P280** Wear protective gloves/protective clothing/eye protection/face protection

**P281** Use personal protective equipment as required

#### **Precautionary Statement (s) - Response**

P301+P310 IF SWALLOWED: Immediately call doctor/ physician.

P302+P352 IF ON SKIN: Wash with plenty of soap and water

**P303+P361+P353** IF ON SKIN (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/shower.

**P305+P351+P338** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P308+P313 IF exposed or concerned: Get medical advice/attention.

Product Identifier: Light Sour Crude Oil Ver. 2

**P312** Call a POISON CENTER or doctor/physician if you feel unwell **P331** Do NOT induce vomiting.

P332+P313 If skin irritation occurs: Get medical advice/attention.

**P337+P313** If eye irritation persists: Get medical advice/ attention.

P362 Take off contaminated clothing and wash before reuse.

**P370+P378** In case of fire: Use foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only for extinction.

P391 Collect spillage

#### <u>Precautionary Statement (s) – Storage</u>

P405 Store locked up

P403+P233+P235 Store in a well-ventilated place. Keep cool.

#### Precautionary Statement (s) - Disposal

**P501** Dispose of contents/container to approved facility

#### 3. Composition / Information on Ingredients

**Chemical Identity** : A highly complex mixture of paraffinic, cycloparaffinic (naphthenic)

and aromatic hydrocarbons, containing a low percentage of sulfur and

trace amounts of nitrogen and oxygen compounds.

Common Name : Crude Oil

**Composition Information** 

Name	CAS Number	Percent (%)	
Crude Oil	8002-05-9	100	
Benzene	71-43-2	<1.0	

### 4. First-Aid Measures

**Inhalation** : Move the exposed person to fresh air. If not breathing, clear airways

and give artificial respiration. If breathing is difficult, qualified personnel should administer humidified oxygen. Seek medical attention if breathing

difficulties continue.

**Skin** : Remove contaminated shoes and clothing, and flush affected areas with

large amounts of water. If skin surface is damaged, apply a clean dressing and seek medical attention. If skin surface is not damaged, clean affected area thoroughly with mild soap and water. Seek medical

Product Identifier: Light Sour Crude Oil Ver. 2

Issue Date: 15-Dec-2021
Revision Date: 06-Feb-2024
Ref No: ARL-SDS-001B

Page **3** of **11** 

attention if tissue appears damaged or if pain or irritation persists.

Launder or discard contaminated clothing.

Eye Contact : Flush eyes with water for at least 15 minutes. Hold eyelids apart to

ensure complete irrigation of the eye. Remove contact lenses, if worn, after initial flushing. Do not use eye ointment. Seek medical attention.

Ingestion : Aspiration hazard. Do not induce vomiting or give anything by mouth

because the material can enter the lungs and cause severe lung damage. If spontaneous vomiting is about to occur, place victim's head below knees. If victim is drowsy or unconscious, place on the left side with head down. Do not leave victim unattended and observe closely for adequacy

of breathing. Seek medical attention.

Most Important : Acute: Headache, drowsiness, dizziness, loss of coordination, disorientation and fatigue

Symptoms and disorientation and fatigue

Effects Delayed: Dry skin and possible irritation with repeated or prolonged

exposure

Potential : Chronic effects of overexposure are similar to acute effects including

central nervous system (CNS) effects and CNS depression. Effects may also include irritation of the digestive tract, irritation of the respiratory

tract, nausea, vomiting and skin dermatitis.

rotentiai

**Chronic Health** 

**Effects** 

#### 5. Fire Fighting Measures

**Hazchem Code** : 3WE

**Suitable Extinguishing** 

Media

: Small Fire: Dry chemical, CO2, water spray or regular foam. Large Fire: Water spray, fog or regular foam. Move containers from fire area if

you can do it without risk.

Unsuitable

**Extinguishing Media** 

: Don't use water in jet

Hazards from

**Combustion Products** 

: Oxides of carbon. Oxides of sulphur.

**Specific Hazards during** 

Fire Fighting

: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire exposed

containers cool.

Product Identifier: Light Sour Crude Oil Ver. 2

Issue Date: 15-Dec-2021
Revision Date: 06-Feb-2024
Ref No: ARL-SDS-001B

Page 4 of 11

**Decomposition Temperature** 

: Not Available

Precautions in connection with Fire

: Evacuate area. If a leak or spill has not ignited, use water spray to disperse the vapours and to protect personnel attempting to stop a leak. Prevent run-off from fire control or dilution from entering streams, sewers or drinking water supply. Fire-fighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

#### 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures : Do not touch or walk through spilled material. Use personal protection recommended in Section 8. Don full-face, positive pressure, self-contained breathing apparatus.

**Environmental Precautions** 

: Prevent entry into waterways, sewers, basements or confined areas.

Methods and Materials for Containment and Cleaning up : Stop leak if you can do it without risk. A vapor suppressing foam may be used to reduce vapors.

Methods and materials for containment and cleaning up

**Small spill**; Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill; Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, waterways, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Product Identifier: Light Sour Crude Oil Ver. 2

#### 7. <u>Handling & Storage</u>

#### Safe Handling

: Put on appropriate personal protective equipment. Avoid exposure, obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing.

Do not breathe vapor or mist. Do not swallow. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated.

Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous.

Do not reuse container. Handling operations that can promote accumulation of static charges include but are not limited to: mixing, filtering, pumping at high flow rates, splash filling, creating mists or sprays, tank and container filling, tank cleaning, sampling, gauging, switch loading, vacuum truck operations.

#### **Safe Storage Conditions**

: Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials. Keep out of the reach of children. Headspaces in storage containers may contain toxic hydrogen sulphide gas.

#### Recommended Storage Materials

: Structural materials and lighting and ventilation systems should be corrosion resistant. For containers, or container linings use mild steel, stainless steel. Aluminum may also be used for applications where it does not present an unnecessary fire hazard. Examples of suitable materials are: high density polyethylene (HDPE), polypropylene (PP), and Viton (FKM), which have been specifically tested for compatibility with this product.

Product Identifier: Light Sour Crude Oil Ver. 2

### SAFETY DATA SHEET

#### 8. Exposure Control / Personnel Protection

Component	CAS No	Value Type	Control	Basis
		(Form of Exposure)	Parameters / Permissible Concentration	
Crude Oil	8002-05-9	TWA	400 ppm 8 hours	OSHA PEL
Benzene	71-43-2	TWA	1 ppm 8 hours	OSHA PEL
H2S	7783-06-4	TWA	10 ppm 8 hours	OSHA PEL

**Occupational Exposure** 

**Limit Values** 

TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working

day, for a five-day week.

**Appropriate Engineering Controls** 

: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof

ventilation equipment.

**Respiratory Protection** 

: If engineering controls are not effective in controlling airborne exposure then an approved respirator with a replaceable vapor/ mist filter should be used. Where ventilation is not adequate, respiratory protection

may be required. Avoid breathing vapors or mists.

**Eve Protection** 

: Safety glasses with side shields, chemical goggles or full-face shield as appropriate should be used. Final choice of appropriate eye/face protection will vary according to individual circumstances. Eye

protection devices should conform to relevant regulations.

**Hand Protection** 

: Wear gloves of impervious material such as nitrile gloves (Breakthrough time of > 240 minutes) neoprene, PVC gloves. Final choice of appropriate gloves will vary according to individual circumstances i.e. methods of handling or according to risk assessments undertaken. Occupational protective gloves should conform to relevant

regulations.

**Body Protection** 

: Clean clothing or protective clothing should be worn, preferably with

an apron.

**Hygiene Measures** 

: Always wash hands before smoking, eating or using the toilet. Wash contaminated clothing and other protective equipment before storing or

Page **7** of **11** 

re- using.

### 9. Physical & Chemical Properties

Physical State : Liquid
Flammability : Flammable
Auto-ignition Temp :>260°C
Color : Brown
Odor : Petroleum
Initial Boiling Point :>15°C

**Specific Gravity** @ : 0.780 -0.840

15.6°C/ 15.6°C

**Vapor Pressure, at** : 10 psi

37.8°C

Flash point : Not available
Viscosity @40°C : 1.0~3.0 cSt
Benzene : <1.0 %
Total Sulphur : <0.5 %

Asphaltene : <0.5 %

### 10.Stability & Reactivity

Chemical Stability : Stable under normal conditions of storage and handling

Conditions to Avoid : Avoid high temperatures, open flames, sparks, welding, smoking and

other ignition sources

**Incompatible Products**: Keep away from strong oxidizers.

**Hazardous**: Under normal conditions of storage and use, hazardous decomposition

**Decomposition Products** products should not be produced

### 11. Toxicological Information

**Toxicology Information** : Acute Toxicity – Oral

LD50 :( Rat) : >5000 mg/kg **Acute Toxicity – Inhalation**LD50 :( Rat) : >5 mg/l / 4h **Acute Toxicity – Dermal**LD50 :( Rabbit) : >2000 mg/kg

Product Identifier: Light Sour Crude Oil Ver. 2

Issue Date: 15-Dec-2021
Revision Date: 06-Feb-2024
Ref No: ARL-SDS-001B

Page 8 of 11

Ingestion : May cause gastrointestinal irritation. Signs/symptoms may include

abdominal pain, stomach upset, nausea, vomiting and diarrhea.

**Inhalation** : May cause drowsiness or dizziness. May cause respiratory irritation.

Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain. Excessive inhalation may cause headache, dizziness, and confusion, loss of appetite and/or

loss of consciousness.

This product may contain small amounts of Hydrogen sulphide which may accumulate in confined spaces. Inhalation of Hydrogen sulfide may cause loss of sense of smell, major irritation of the respiratory tract, headache, nausea, vomiting, dizziness, and fluid buildup in the lungs

(pulmonary edema), which can be fatal.

Skin : Causes skin irritation. Signs/symptoms may include localized redness,

swelling, and itching.

Eye : May cause eye irritation. Signs/symptoms may include redness,

swelling, pain, tearing, and blurred or hazy vision.

Respiratory

Sensitization

: Not available

**Skin Sensitization** : Not available

**Germ cell Mutagenicity**: May cause genetic defects.

Carcinogenicity : May cause cancer. Risk of cancer depends on duration and level of

exposure.

**Reproductive Toxicity** : Suspected of damaging fertility or the unborn child. Studies exist which

report a link to crude oil and reproductive effects including menstrual

disorders.

**Aspiration Respiratory** 

**Organs Hazard** 

: The major health threat of ingestion occurs from the danger of aspiration (breathing) of liquid drops into the lungs, particularly from

vomiting. Aspiration may result in chemical pneumonia (fluid in the

lungs), severe lung damage, respiratory failure and even death.

Product Identifier: Light Sour Crude Oil Ver. 2

Issue Date: 15-Dec-2021
Revision Date: 06-Feb-2024
Ref No: ARL-SDS-001B

Page **9** of **11** 

#### 12. Ecological Information

**Ecotoxicity**: Toxic to aquatic organisms, may cause long-term adverse effects in the

aquatic environment.

Biodegradability

Persistence/ Degradability : Most crude oils are not regarded as readily biodegradable. Most of the nonvolatile constituents are inherently biodegradable. Some of the highest molecular weight components are persistent in water. The individual hydrocarbon components of material are differentially soluble

in water with aromatic hydrocarbons tending to be more water soluble

than aliphatic hydrocarbons

**Mobility** : Spillages may penetrate the soil causing ground water contamination.

Other Ecological Information

: Spills may form a film on water surfaces causing physical damage to

organisms. Oxygen transfer could also be impaired.

### 13. <u>Disposal Considerations</u>

Dispose of waste according to applicable local and national regulations. Labels should not be removed from containers until they have been cleaned. Advice flammable nature. Empty containers may contain flammable residues. Contaminated containers must not be treated as household waste. Containers should be cleaned by appropriate methods and then re-used or disposed of by landfill or incineration as appropriate. Do not incinerate closed containers. Wastes including emptied containers are controlled wastes and should be disposed of in accordance with all applicable local and national regulations. Do not allow into drains or watercourses or dispose of where ground or surface waters may be affected.

### **14.Transport Information**

**Transport** : Dangerous goods of Class 3 (Flammable Liquid) are incompatible in a

**Information** placard load with any of the following:

**UN proper shipping** 

name

: PETROLEUM CRUDE OIL

**U.N. Number** : 1267

Packing Group : I

Product Identifier: Light Sour Crude Oil Ver. 2

Issue Date: 15-Dec-2021
Revision Date: 06-Feb-2024
Ref No: ARL-SDS-001B

Page **10** of **11** 

#### 15. Regulatory Information

Classified as Hazardous according to the Globally Harmonized System of classification and labeling of chemicals (GHS) including Work, Health and Safety regulations.

**OSHA Hazards** : Flammable liquid, highly toxic by ingestion, Moderate skin irritant,

severe eye irritant, Carcinogen

### 16. Other Information including Information on Preparation and revision of the SDS

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process.
